

Set Up E-mail on an Android Phone

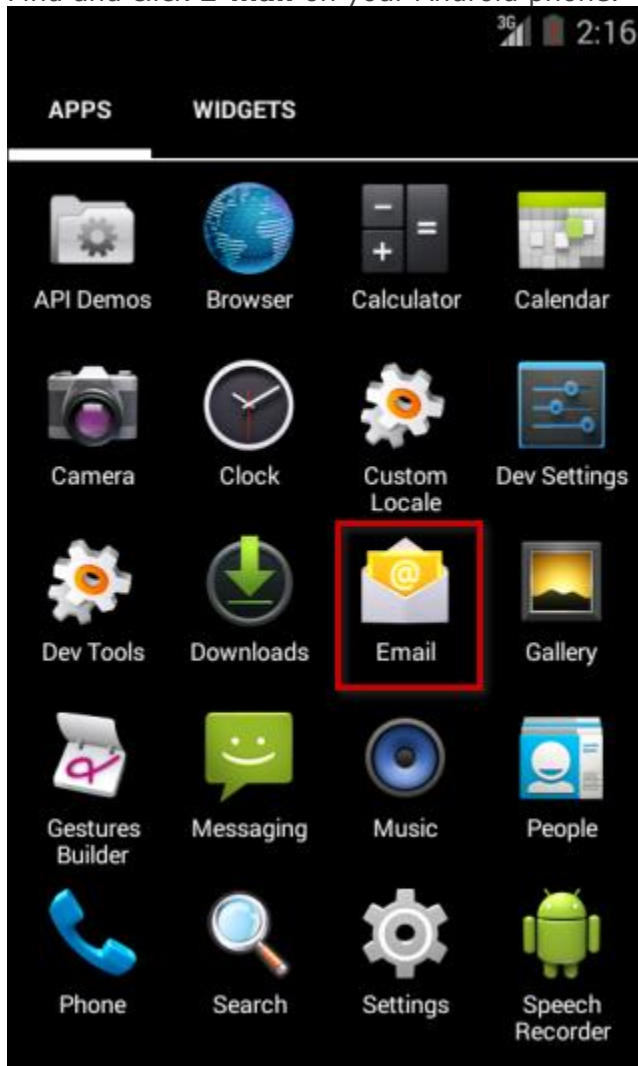

For BNIN e-mail accounts

Learn how to set up your BNIN e-mail account on your Android smartphone, allowing you to send and receive e-mails wherever you go.

The images used in this guide reflect Android OS 4.4 (KitKat).

Step 1

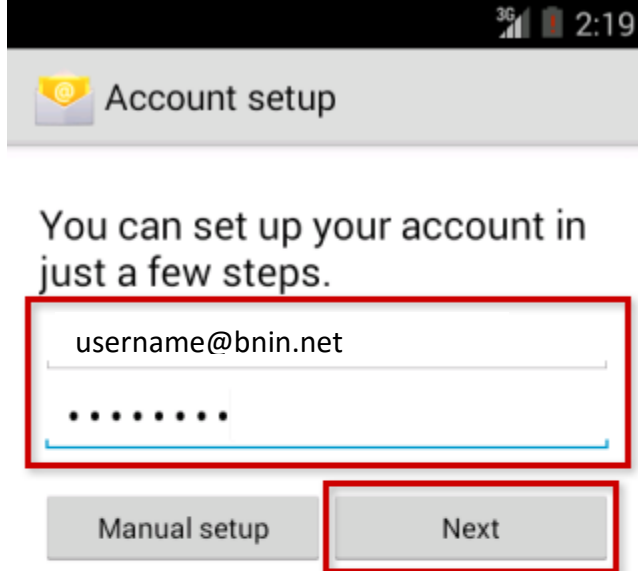

Find and click **E-mail** on your Android phone.

The Email icon is located on the apps page

Step 2

Enter your **e-mail address** and **password** and then press **Next**.

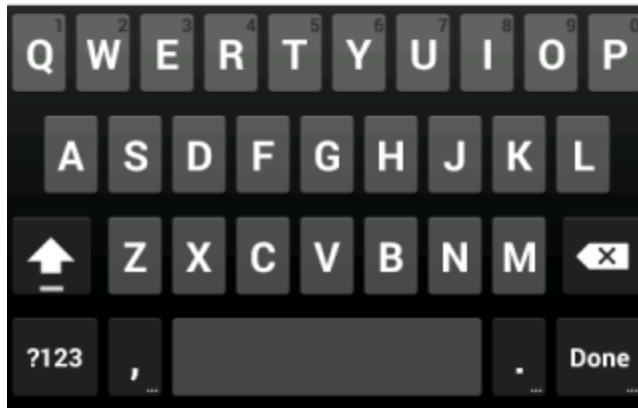

Account setup

You can set up your account in just a few steps.

username@bnin.net

.....

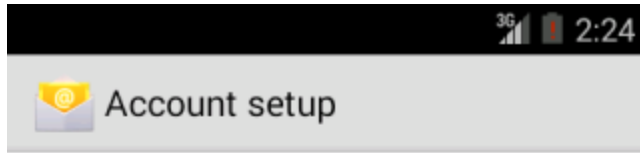

Manual setup Next

The basic settings screen

Step 3

Step 5

Enter the following outgoing server information and press **Next** when finished:

Field	Data
SMTP server	mail.bnin.net
Port	587
Security type	None
Require signin	Checked
Username	Your full e-mail address
Password	Your e-mail address password

The screenshot shows the 'Account setup' screen on an Android phone. At the top, there is a status bar with '3G', signal strength, battery, and the time '2:34'. Below the status bar is a header with an email icon and the text 'Account setup'. The main content area contains several input fields: 'SMTP server' with the value 'mail.bnin.net', 'Port' with '587', 'Security type' with a dropdown menu set to 'None', a checked checkbox for 'Require signin', 'Username' with 'username@bnin.net', and 'Password' with a masked field of dots. At the bottom, there are two buttons: 'Previous' and 'Next'. The 'Next' button is highlighted with a red rectangular border.

The outgoing server settings screen

Step 6

Give this account a name and enter **Your name**. It is suggested to use your e-mail address as the account name to differentiate it from any other e-mail accounts you may set up on your phone.

Account setup

Your account is set up and email is on its way!

Give this account a name (optional)

BNIN Email

Your name (displayed on outgoing messages)
